## Progress in Cancer Immunotherapies

Guest Editors:

### **Dr. Van Ngu Trinh**

Department of Experimental  
Radiation Oncology, The  
University of Texas MD Anderson  
Cancer Center, Houston, TX, USA

### **Dr. Phuc Loi Luu**

Garvan Institute of Medical  
Research, Sydney, Australia

Deadline for manuscript  
submissions:

**25 December 2024**

### **Message from the Guest Editors**

In recent years, the field of cancer immunotherapy has undergone a transformative evolution, emerging as a beacon of hope in the fight against cancer. From immune checkpoint inhibitors to adoptive cell therapies, the repertoire of immunotherapeutic strategies continues to expand, presenting unprecedented opportunities to revolutionize cancer care.

This Special Issue aims to delineate the contours of this rapidly evolving landscape, concentrating on key aspects such as the development of novel agents, breakthroughs in understanding the intricate interplay of immune cells within the tumor microenvironment, and strides in personalized immunotherapy approaches. As we navigate this exciting frontier, the collective insights presented within this compilation strive to accelerate the translation of groundbreaking discoveries into tangible clinical outcomes, fostering a deeper understanding of the challenges and promises inherent in the pursuit of conquering cancer through the prism of immunological innovation.

# Special Issue

*cells*

an Open Access Journal by MDPI

## Editors-in-Chief

**Prof. Dr. Alexander E. Kalyuzhny**

Neuroscience, UMN Twin Cities,  
6-145 Jackson Hall, 321 Church St  
SE, Minneapolis, MN 55455, USA

**Prof. Dr. Cord Brakebusch**

Biotech Research & Innovation  
Centre, The University of  
Copenhagen, Copenhagen,  
Denmark

## Message from the Editorial Board

*Cells* has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [CAPus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Cell Biology*) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)
