## Autophagy in COVID-19 and/or Autoimmune Diseases

Guest Editor:

**Dr. Tania Colasanti**

Dipartimento di Scienze Cliniche  
Internistiche, Anestesiologiche e  
Cardiovascolari, University  
Sapienza, 00185 Rome, Italy

Deadline for manuscript  
submissions:

**closed (31 October 2022)**

### Message from the Guest Editor

Autophagy is potentially involved in the pathogenesis of many autoimmune diseases, such as (but not only) Systemic Lupus Erythematosus (SLE), Rheumatoid Arthritis (RA), Sjögren Syndrome (SjS), in which this mechanism can play different leading roles, resulting in multiple manifestations, depending on cell type, disease characteristics and also drug therapy. Recently, autophagy has been considered also an emerging target for CoViD-19, widening the spectrum of the autophagy-related diseases. The purpose of this Special Issue is a further in-depth analysis of autophagy both in autoimmune diseases and/or in CoViD-19, since these disorders can share common features and manifestations, but they can also save new distinct insights, beside the already known aspects. Lately, CoViD-19 has been implicated in the development of some autoimmune diseases, and this may shed a light on the association between autoimmunity and infections and, from this point of view, autophagy could be one of these links.

## Editors-in-Chief

### **Prof. Dr. Alexander E. Kalyuzhny**

Neuroscience, UMN Twin Cities,  
6-145 Jackson Hall, 321 Church St  
SE, Minneapolis, MN 55455, USA

### **Prof. Dr. Cord Brakebusch**

Biotech Research & Innovation  
Centre, The University of  
Copenhagen, Copenhagen,  
Denmark

## Message from the Editorial Board

*Cells* has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [CAPus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Cell Biology*) / CiteScore - Q1 (*General Biochemistry, Genetics and Molecular Biology*)
