COVID19, Renin-Angiotensin System and Endothelial Dysfunction

Guest Editor:

Prof. Dr. Nader Rahimi

Department of Pathology, Boston
University, 670 Albany St. Room
510, Boston, MA 02118, USA

Deadline for manuscript
submissions:

closed (30 June 2021)

Message from the Guest Editor

The newly emergent novel coronavirus disease 2019 (COVID-19) outbreak has posed a serious threat to global public health with major worldwide socio-economic disruption. Now, evidence strongly indicates that mortality with COVID19 is associated with pre-existing conditions such as cardiovascular diseases, diabetes, and hypertension. In light of this, a systematic examination of the molecular basis of SARS-CoV-2 infection, the role of the renin-angiotensin system, in particular, the role angiotensin-converting enzyme 2 (ACE2) and the role of endothelial dysfunction in COVID-19-associated mortality and vice-versa is urgently needed. Understanding the role of the cardiovascular system in SARS-CoV-2 infection is essential to provide medical care for COVID-19 patients with cardiovascular co-morbidity. Moreover, comprehensive knowledge is urgently needed for a mechanistic understanding of the disease and the development of potential therapeutic strategies against COVID-19.

Special Issue

cells

an Open Access Journal by MDPI

Editors-in-Chief

Dr. Alexander E. Kalyuzhny

Neuroscience, UMN Twin Cities,
6-145 Jackson Hall, 321 Church St
SE, Minneapolis, MN 55455, USA

Prof. Dr. Cord Brakebusch

Biotech Research & Innovation
Centre, The University of
Copenhagen, Copenhagen,
Denmark

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)
