CRISPR Genome Editing: Principle, Method, Tool and Application

Guest Editors:

Prof. Dr. Baohong Zhang

Department of Biology, East
Carolina University, Greenville,
NC 27858, USA

Dr. Turgay Unver

Ficus Biotechnology, Ostim
Teknopark, No: 1/1/76,
Yenimahalle, Ankara 06378,
Turkey

Deadline for manuscript
submissions:

closed (31 October 2022)

Message from the Guest Editors

Dear Colleagues,

Genome editing is becoming a powerful, robust, and versatile tool for gene functional study and for gene therapy, which can lead to improvements in both plants and animals. This field has developed rapidly in recent years, as evidenced in the new Cas that have been identified and the new bioinformatics tools that have been developed. Genome editing is widely used in many fields at present, not only for gene functional study but also for gene therapy and crop improvement. In this Special Issue, both reviews and research papers, as well as method and bioinformatics papers, are welcomed.

- genome editing
- CRISPR/Cas9
- gene functional study
- gene knockout
- gene regulation
- gene therapy
- epigenetic
- plant improvement
- biotechnology

Special Issue

cells

an Open Access Journal by MDPI

Editors-in-Chief

Prof. Dr. Alexander E. Kalyuzhny

Neuroscience, UMN Twin Cities,
6-145 Jackson Hall, 321 Church St
SE, Minneapolis, MN 55455, USA

Prof. Dr. Cord Brakebusch

Biotech Research & Innovation
Centre, The University of
Copenhagen, Copenhagen,
Denmark

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [CAPus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Cell Biology*) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)
