## Pathometabolism: Understanding Disease through Metabolism

Collection Editors:

**Prof. Dr. Ferdinando Chiaradonna**

Department Of Biotechnology and Biosciences, University of Milano Bicocca, 20126 Milano, Italy

**Prof. Dr. Domenica Scumaci**

Magna Græcia University of Catanzaro

**Dr. Andre Wegner**

Department of Bioinformatics and Biochemistry, BRICS, Technische Universität Braunschweig, 38106 Braunschweig, Germany

### Message from the Collection Editors

Dear Colleagues,

This Topical Collection entitled “Pathometabolism: Understanding disease through metabolism” will collect high-quality research articles, perspectives, communications, and review articles describing metabolic alterations induced by human pathologies. We hope that your contributions will advance the field and lead to the development of new diagnostic and therapeutic regimens for human diseases. Since the Topical Collection aims to illustrate, through selected works, advancing research in cellular metabolism, we also encourage Editorial Board Members of the Cellular Metabolism Section of *Cells* to contribute feature papers reflecting the latest progress in their research field, or to invite relevant experts and colleagues to submit papers.

We welcome manuscripts that emphasize phenotypic, biochemical, molecular features, and functional mechanisms through which cell or tissue metabolism influences or causes human pathologies. Relevant research topics include, but are not limited to, the following:

- Cancer Metabolism;
- Immunometabolism;
- Metabolic host pathogen interaction;
- Brain Metabolism;
- Metabolic human disorders

## Editors-in-Chief

### **Dr. Alexander E. Kalyuzhny**

Dental Basic Sciences, University of Minnesota, 308 Harvard St. SE, Minneapolis, MN 55455, USA

### **Prof. Dr. Cord Brakebusch**

Biotech Research & Innovation Centre, The University of Copenhagen, Copenhagen, Denmark

## Message from the Editorial Board

*Cells* has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [CAPus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)
