Message from the Guest Editor

Dear Colleagues,

This Special Issue aims to provide a comprehensive overview of state-of-the-art of cell biology in Japan. We invite research papers that will consolidate our understanding in this area. The Special Issue will publish full research articles and comprehensive reviews. Potential topics include but are not limited to the following research areas:

- OMICS: transcriptomics, genomics, proteomics, metabolomics, glycomics, lipidomics, fluxomics, and biomics;
- Cell structure: organelles, cytoskeleton, cell membrane, capsule, flagella, etc.;
- Cell physiology: cell growth, metabolism, protein synthesis, division, active/passive transport, intra- and extracellular signaling, DNA repair, etc.;
- Cell movement and motility;
- Autophagy, Apoptosis, Cell aging;
- Cell techniques;
- Cell growth and differentiation;
- Hematopoiesis and stem cells, Cancer stem cells;
- Genetic disorders;
- CAR-T cell research

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.
