## Cell Biology of Viral Infections

Guest Editor:

### **Dr. Pierre-Yves Lozach**

CellNetworks—Cluster of Excellence and Center for Integrative Infectious Diseases Research (CIID), Department of Infectious Diseases, Virology, University Hospital Heidelberg, 69120 Heidelberg, Germany

Deadline for manuscript submissions:

**closed (15 August 2020)**

### **Message from the Guest Editor**

Dear Colleagues,

In this Special Issue of *Cells*, I would like to include both review papers and research articles that together can not only provide a glance into the latest research in the cell biology of viral infections but also highlight the major achievements in the field of virus–host cell interactions made in recent years. Studies covering all aspects of virus life cycles and interactions between viruses and host cells are welcome, which also include novel technological approaches. With this Special Issue, I aim to offer a space for enthusiastic discussions on future research directions on virus–host cell interactions and promote some areas that are understudied or emerging.

Dr. Pierre-Yves Lozach

*Guest Editor*

### *Participating Authors*

1. Rong Zhang and Michael Diamond
2. Darius Moradpour and Jérôme Gouttenoire
3. Oliver Fackler
4. Harald Wodrich
5. Angela Pearson
6. Jamel Mankouri
7. Florian Schmidt
8. Ali Amara

## Editors-in-Chief

### **Dr. Alexander E. Kalyuzhny**

Dental Basic Sciences, University of Minnesota, 308 Harvard St. SE, Minneapolis, MN 55455, USA

### **Prof. Dr. Cord Brakebusch**

Biotech Research & Innovation Centre, The University of Copenhagen, Copenhagen, Denmark

## Message from the Editorial Board

*Cells* has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [CAPus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)
