Deadline for manuscript
submissions:

closed (20 July 2021)

Message from the Guest Editor

Dear Colleagues,

Mitochondrial quality is controlled by a myriad of interconnected systems, including: 1. enzymatic and non-enzymatic elements capable of fighting oxygen-mediated mitochondrial toxicity; 2. mitochondrial proteases and chaperones responsible for the maintenance of mitochondrial proteostasis; and 3. a multilayer network of proteins involved in the control of mitochondrial morphology, location, and number. In this Special Issue, we invite investigators to contribute their original research, perspective or review articles to broaden our understanding of the regulatory processes involved in mitochondrial bioenergetics, surveillance, and quality control mechanisms in health and disease. We encourage the submission of basic, translational, and clinical studies describing signaling mechanisms and novel approaches for diagnostics and therapeutics according to the proposed topic.

Dr. Julio Cesar Batista Ferreira

Prof. Dr. Cord Brakebusch

Biotech Research & Innovation
Centre, The University of
Copenhagen, Copenhagen,
Denmark

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [CAPus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Cell Biology*) / CiteScore - Q1 (*General Biochemistry, Genetics and Molecular Biology*)
