## Understanding the Molecular Mechanisms of Angiogenesis

Guest Editors:

**Dr. Arianna Giacomini**

Unit of Experimental Oncology  
and Immunology, Department of  
Molecular and Translational  
Medicine, University of Brescia,  
25123 Brescia, Italy

**Dr. Elisabetta Grillo**

Unit of Biotechnology,  
Department of Molecular and  
Translational Medicine,  
University of Brescia, 25123  
Brescia, Italy

Deadline for manuscript  
submissions:

**closed (30 June 2023)**

### Message from the Guest Editors

Dear Colleagues,

A deeper understanding of the molecular mechanisms driving angiogenesis is critical to develop effective treatments for human diseases driven by defects in blood vessel growth and to overcome the limitations of current approaches.

This Special Issue aims to summarize the current knowledge and cutting-edge research on the molecular mechanisms of angiogenesis. Reports can address both physiological and pathological angiogeneses. In the latter case, we ask authors to focus on potential new drug targets or therapeutic strategies. Translational studies are particularly welcome. We also encourage authors to present non-canonical views in opinion papers or reviews.

For further information, please visit the [Special Issue website](#).

## Editors-in-Chief

### **Dr. Alexander E. Kalyuzhny**

Neuroscience, UMN Twin Cities,  
6-145 Jackson Hall, 321 Church St  
SE, Minneapolis, MN 55455, USA

### **Prof. Dr. Cord Brakebusch**

Biotech Research & Innovation  
Centre, The University of  
Copenhagen, Copenhagen,  
Denmark

## Message from the Editorial Board

*Cells* has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [CAPus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)
