Message from the Guest Editors

Dear Colleagues,

We invite all basic and clinic researchers working on retinal degenerative, ganglion dystrophy, and corneal epithelial stem cell deficiency diseases to participate in this Special Issue. Original research articles, reviews, or shorter perspective articles on all aspects related to ocular stem cell therapies, underlying molecular mechanisms, and effective methods to activate stem cells for directed differentiation are welcome. Relevant topics include but are not limited to stem cells and cell-based therapies.

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [CAPus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)
