## Stem Cell Research on Cardiology: Series 2

Guest Editor:

### **Prof. Dr. Robert David**

1. Department of Cardiac  
Surgery, Rostock University  
Medical Center, 18057 Rostock,  
Germany

2. Department of Life, Light &  
Matter, Interdisciplinary Faculty,  
Rostock University, 18059  
Rostock, Germany

Deadline for manuscript  
submissions:

**closed (1 December 2021)**

### **Message from the Guest Editor**

Dear Colleagues,

Cardiovascular diseases are the leading cause of death in developed countries with very limited therapeutic options. A major cause lies in the very restricted regenerative capacity of terminally differentiated cardiomyocytes post injury – therefore novel approaches toward cardiac regenerative therapy is highly desired. Following injury of the myocardium, resident cardiac fibroblasts, representing over 50% of the cells in the heart, start to proliferate and produce an extracellular matrix, which will ultimately lead to fibrosis and heart failure. A large number of preclinical and clinical trials have shown stem cell therapy to be a promising therapeutic approach for the treatment of cardiovascular diseases. The current Special Issue will accept original studies, reviews, and technical reports in the field of cardiovascular stem cell biology and reprogramming, written by scientists active in the field.

# Special Issue

*cells*

an Open Access Journal by MDPI

## Editors-in-Chief

### **Prof. Dr. Alexander E. Kalyuzhny**

Neuroscience, UMN Twin Cities,  
6-145 Jackson Hall, 321 Church St  
SE, Minneapolis, MN 55455, USA

### **Prof. Dr. Cord Brakebusch**

Biotech Research & Innovation  
Centre, The University of  
Copenhagen, Copenhagen,  
Denmark

## Message from the Editorial Board

*Cells* has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [CAPus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Cell Biology*) / CiteScore - Q1 (*General Biochemistry, Genetics and Molecular Biology*)
