Targeting Hallmarks of Cancer

Message from the Guest Editor

Cancer remains one of the most significant challenges in modern medicine, characterized by its complexity, heterogeneity, and ability to evolve rapidly. The pursuit of new, efficient drugs to combat cancer is a top priority in biomedical research. However, the development of such therapies is not a straightforward process. It requires a deep understanding of the fundamental mechanisms driving cancer progression, including the hallmark traits of cancer cells and the intricate signaling pathways involved in maintaining the tumor phenotype. In this context, the creation and utilization of biological models, such as organotypic cell cultures, and the study of epigenetic regulators, like long non-coding RNAs (lncRNAs) and microRNAs (miRNAs), are crucial for advancing our ability to develop effective anti-cancer drugs. You may choose our [Joint Special Issue](#) in *Cancers*.

About the Journal

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Editors-in-Chief

Dr. Alexander E. Kalyuzhny

Dental Basic Sciences, University of Minnesota, 308 Harvard St. SE,
Minneapolis, MN 55455, USA

Prof. Dr. Cord Brakebusch

Biotech Research & Innovation Centre, The University of Copenhagen,
Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed,
MEDLINE, PMC, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Cell Biology) / CiteScore - Q1 (General
Biochemistry, Genetics and Molecular Biology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.5 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
