

Special Issue

Natural Products and Their Derivatives Against Human Disease

Message from the Guest Editor

Dear colleagues, The aim of this Special Issue is to highlight promising natural products and derivatives used for preventing and treating human disease, as well as understanding the mechanisms involved. Therefore, we are pleased to invite you to submit an article or review focused on the cellular and molecular roles of natural products and their derivatives in human disease. Potential topics may include, but are not limited to, the following:

- 1) The exploration of cellular and molecular mechanisms of natural products and their derivatives in human disease.
- 2) In vivo or cell-based experiments that can reveal the molecular mechanisms of natural products and their derivatives for various diseases, such as cancer, infection, cardiovascular diseases, multiple sclerosis, COVID-19, etc.
- 3) The synergistic and antagonistic effects of various natural products and their derivatives on various diseases.

About the Journal

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Editors-in-Chief

Dr. Alexander E. Kalyuzhny

Dental Basic Sciences, University of Minnesota, 308 Harvard St. SE,
Minneapolis, MN 55455, USA

Prof. Dr. Cord Brakebusch

Biotech Research & Innovation Centre, The University of Copenhagen,
Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
