

Special Issue

CD38 in Basic Science: Reflecting on the Past to Move to the Future

Message from the Guest Editors

With an abundance of scientific data being released on CD38 biology and the development of novel anti-CD38 therapies, our conference entitled, “[CD38 in Basic Science and Clinical Practice: Reflecting on the Past to Move into the Future](#)” is timely, and will bring together experts investigating the role of CD38 in cancer, ageing, autoimmunity, neurology and behaviour.

This important conference will foster much needed engagement between clinicians, basic-science researchers and pharmaceutical companies working on CD38. As anti-CD38 therapies are currently approved for use in patients with multiple myeloma, a major theme of the meeting will be on the optimal use of these agents and novel therapeutic strategies once patients stop responding to the targeted interference of CD38.

This Special Issue aims to collect papers related to major topics of our conference, including Reviews, Original papers, Commentaries and Editorials. Keywords

- CD38
- multiple myeloma
- myeloma
- MGUS
- monoclonal antibodies
- immunotherapy

About the Journal

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Editors-in-Chief

Dr. Alexander E. Kalyuzhny

Dental Basic Sciences, University of Minnesota, 308 Harvard St. SE,
Minneapolis, MN 55455, USA

Prof. Dr. Cord Brakebusch

Biotech Research & Innovation Centre, The University of Copenhagen,
Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
