

## Special Issue

# The Role of T-Cells in Lymphomas and Leukemias

### Message from the Guest Editor

We are delighted to announce a Special Issue of *Cells*, focusing on "The Role of T-cells in Lymphomas and Leukemias". This Special Issue aims to highlight the latest research and advancements in understanding the critical functions of T cells in the pathogenesis, progression, and treatment of lymphomas and leukemias. T cells play a pivotal role in the immune response against malignancies. Their involvement in both protective immunity and disease pathology offers a dual perspective that is crucial for developing targeted therapies and improving patient outcomes. This Special Issue seeks to compile cutting-edge research articles and reviews that explore various aspects of T cell biology in the context of these hematologic cancers. We look forward to your valuable contributions that will drive forward our understanding of T cells in the context of lymphomas and leukemias. Together, we can pave the way for innovative therapies and improved patient care.

## About the Journal

### Message from the Editorial Board

*Cells* has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

---

### Editors-in-Chief

Dr. Alexander E. Kalyuzhny

Dental Basic Sciences, University of Minnesota, 308 Harvard St. SE,  
Minneapolis, MN 55455, USA

Prof. Dr. Cord Brakebusch

Biotech Research & Innovation Centre, The University of Copenhagen,  
Copenhagen, Denmark

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.5 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
