

Special Issue

Progenitor and Stem Cells Therapy in Bone and Cartilage Tissue Engineering

Message from the Guest Editors

We are pleased to invite you to submit an article for publication in the Special Issue on "Progenitor and Stem Cells Therapy in Bone and Cartilage Tissue Engineering". This Special Issue aims to consolidate research on the mechanisms in bone and cartilage regeneration using various stem and progenitor cells, evaluation and improvement of stem cell function, development of unique cell delivery and material combination therapies, and safety of ES and iPS cells in bone and cartilage regeneration. Original research articles and reviews are welcome. Research areas may include (but are not limited to) the following: effects and mechanisms of bone and cartilage regeneration by stem/progenitor cell transplantation; functional and quality evaluation of stem/progenitor cells for bone and cartilage regeneration; combination of stem/progenitor cell transplantation with cell delivery systems and scaffold materials for bone and cartilage regeneration; efficacy and safety of ES cells and iPS cells for bone and cartilage regeneration; drug discovery related to stem/progenitor cells for bone and cartilage regeneration. We look forward to receiving your contributions!

About the Journal

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Editors-in-Chief

Dr. Alexander E. Kalyuzhny

Dental Basic Sciences, University of Minnesota, 308 Harvard St. SE,
Minneapolis, MN 55455, USA

Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
