

## Special Issue

# The Role of Airway Epithelial Cells in Health and Disease

### Message from the Guest Editors

The airway epithelium provides more than just a physical barrier that protects the body from inhaled pathogens. Airway epithelial cells are crucial for actively maintaining airway surface liquid homeostasis, mucociliary transport, antigen processing, and pathogen sensing. A better understanding of the myriad roles played by airway epithelial cells has been accelerated in recent years by the identification of distinct epithelial cell populations that constitute, and are resident in, the human airways, primarily driven by advances in single-cell RNA sequencing. This information has also been crucial in defining epithelial cell lineage and differentiation, as well as identifying rarer epithelial cells. The purpose of this Special Issue is to highlight the important role played by distinct types of airway epithelial cells, and how this information is being harnessed to develop new therapeutic strategies for important diseases such as cystic fibrosis, COVID-19, asthma, and pulmonary fibrosis. The goal of this Issue is to provide a broad scope that includes research papers and reviews related to the functional roles of epithelial cells in airway health and disease.

### Guest Editors

Dr. Michael Gray

Biosciences Institute, University Medical School, Newcastle University, Framlington Place, Newcastle upon Tyne NE2 4HH, UK

Dr. Carlos A. Flores

Centro de Estudios Científicos and Universidad San Sebastián, Valdivia, Chile

### Deadline for manuscript submissions

closed (31 July 2023)

## About the Journal

### Message from the Editorial Board

*Cells* has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

---

### Editors-in-Chief

Dr. Alexander E. Kalyuzhny

Dental Basic Sciences, University of Minnesota, 308 Harvard St. SE,  
Minneapolis, MN 55455, USA

Prof. Dr. Cord Brakebusch

Biotech Research & Innovation Centre, The University of Copenhagen,  
Copenhagen, Denmark

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
