Thoracic Tumors: Decoding Cellular Heterogeneity, Tumor Microenvironment Crosstalk, and Therapeutic Vulnerabilities

Message from the Guest Editors

Lung cancer is the leading cause of cancer-related death among both men and women. New treatment options have led to prolonged time to disease progression and improved overall survival in some groups of patients. Thus, immunotherapy and molecular therapy have become the standard of care for all stages of lung cancer. Immunotherapy can also be used in the treatment of other thoracic tumors, such as mesothelioma and thymic carcinoma. However, for some patient groups, chemotherapy is still an option. In this Special Issue, we invite researchers to submit original articles and reviews addressing all types of thoracic tumors.

About the Journal

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Editors-in-Chief

Dr. Alexander E. Kalyuzhny

Dental Basic Sciences, University of Minnesota, 308 Harvard St. SE,
Minneapolis, MN 55455, USA

Prof. Dr. Cord Brakebusch

Biotech Research & Innovation Centre, The University of Copenhagen,
Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
