Special Issue

Oxidative Stress in Aging and Neurodegenerative Diseases—Series 2

Message from the Guest Editor

A plethora of experimental and clinical research data have indicated that oxidative stress has contributed to aging and related neurodegenerative diseases, such as Alzheimer's disease (AD), Parkinson's disease (PD), Lou Gehrig's disease, and Amyotrophic Lateral Sclerosis (ALS). Further understanding of pathological mechanisms involving oxidative stress in aging and neurodegenerative diseases may help develop targeted antioxidant therapies for aging and age-associated neurodegenerative diseases. Thus, we invite you to contribute to our Special Issue, "Oxidative Stress in Aging and Neurodegenerative Diseases—Series 2." This Special Issue aims to feature oxidative stress research in the field of aging and related neurodegenerative diseases, which we hope will serve as an ideal forum for disseminating innovative research, current advancement, and ideas.

Guest Editor

Dr. Xudong Huang

Neurochemistry Lab, Department of Psychiatry, Massachusetts General Hospital (MGH) and Harvard Medical School (HMS), Charlestown, MA 02129, USA

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Editors-in-Chief

Dr. Alexander E. Kalyuzhny
Department of Neuroscience, University of Minnesota, UMN Twin Cities, 6-145 Jackson Hall, 321 Church St SE, Minneapolis, MN 55455, USA

Prof. Dr. Cord Brakebusch
Biotech Research & Innovation Centre, The University of Copenhagen, Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2026).
