

Special Issue

Research on T Cells in Skin Inflammatory Disorders

Message from the Guest Editors

The skin is a complex organ that provides critical roles in immune surveillance. T cells are critical cells that contribute to the tissue microenvironment in the regulation of an effective immune response. Dissecting normal T cell function and how these regulatory pathways run amok is important to understanding the pathogenesis of skin disease. The advances have shed insight into the role of T cells in immune skin diseases such as atopic dermatitis, psoriasis, vitiligo, hidradenitis suppurative, connective tissue skin disease, as well as malignancies of T cells. Confirming the critical participation of T cells in skin disease has enabled the development of novel drugs that can affect T cell function with a dramatic impact on disease and improvement in patients quality of life. For this Special Issue, we invite authors to submit original articles or reviews that discuss insights into the role of T cells in normal immunity as well as in skin diseases, and therapeutics targeting T cells.

Guest Editors

Dr. Henry K. Wong

1. Department of Dermatology, School of Medicine, University of California San Diego, San Diego, CA, USA
2. Dermatology Section, Department of Medicine, VA San Diego Health System, San Diego, CA, USA

Dr. Qing-Sheng Mi

1. Department of Dermatology, Henry Ford Health, Detroit, MI, USA
2. Department of Medicine, College of Human Medicine, Michigan State University, East Lansing, MI, USA

About the Journal

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Editors-in-Chief

Dr. Alexander E. Kalyuzhny

Dental Basic Sciences, University of Minnesota, 308 Harvard St. SE,
Minneapolis, MN 55455, USA

Prof. Dr. Cord Brakebusch

Biotech Research & Innovation Centre, The University of Copenhagen,
Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
