

Special Issue

Molecular and Cellular Mechanisms of Lymphomas

Message from the Guest Editor

Recent improvements in our knowledge of the molecular pathogenesis of malignant lymphoma offer new rational basis for innovative targeted therapies. However, there is still a consistent gap between the identification of pathways as potential targets and the development of effective therapeutic strategies in this field. This Special Issue aims to provide new concepts concerning the molecular pathogenesis, genetics, molecular diagnosis and cell metabolism of human lymphomas. New experimental findings (molecular diagnosis, molecular and cellular mechanisms) in addition to review articles will be considered. The objective is to eventually favor the translation of genomic and cellular findings into concrete benefits for lymphoma patients.

Guest Editor

Dr. Pier Paolo Piccaluga

Biobank of Research, IRCCS Azienda Ospedaliero-Universitaria di Bologna, Department of Medical and Surgical Sciences (DIMEC), Bologna University, Bologna, Italy

About the Journal

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Editors-in-Chief

Dr. Alexander E. Kalyuzhny

Dental Basic Sciences, University of Minnesota, 308 Harvard St. SE,
Minneapolis, MN 55455, USA

Prof. Dr. Cord Brakebusch

Biotech Research & Innovation Centre, The University of Copenhagen,
Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
