Emerging Research in Renal Cell Carcinoma

Message from the Guest Editor

Renal cell carcinoma (RCC) is an area of active investigation, with ongoing efforts to improve the diagnosis, treatment, and management of this disease. Previous studies have focused on identifying new biomarkers for early detection, developing targeted therapies that improve outcomes and reduce side effects, and exploring the role of immune checkpoint inhibitors in RCC treatment. Recent areas of interest include the use of combination therapies, the development of predictive models to guide treatment decisions, and the use of liquid biopsies to monitor disease progression. Overall, these studies hold promise for improving outcomes for patients with RCC and advancing our understanding of this complex disease, which is the aim of this Special Issue.

About the Journal

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Editors-in-Chief

Dr. Alexander E. Kalyuzhny

Dental Basic Sciences, University of Minnesota, 308 Harvard St. SE,
Minneapolis, MN 55455, USA

Prof. Dr. Cord Brakebusch

Biotech Research & Innovation Centre, The University of Copenhagen,
Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.5 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
