

## Special Issue

# New Concepts Relating Mesenchymal Tumors Based on Genetics and Epigenetics

### Message from the Guest Editor

With the rapid development of new molecular techniques, we are able to reappraise our conventional classification system of soft tissue tumors, at least for certain tumor groups. Moreover, we are responsible for the development of new concepts. A new classification mainly based on molecular findings may help treat patients better and collect adequate data of larger cohorts to understand the underlying biology and improve the therapy and assessment of prognosis. In this Special Issue, we discuss categories of tumors, often selected in small groups based on clinicopathological findings, including immunohistochemistry, and wish to demonstrate that it would be useful to re-classify them due to the same genetic pathways and epigenetic findings leading to a more proper classification with clinical implications.

## About the Journal

### Message from the Editorial Board

*Cells* has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

---

### Editors-in-Chief

Dr. Alexander E. Kalyuzhny

Dental Basic Sciences, University of Minnesota, 308 Harvard St. SE,  
Minneapolis, MN 55455, USA

Prof. Dr. Cord Brakebusch

Biotech Research & Innovation Centre, The University of Copenhagen,  
Copenhagen, Denmark

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
