Special Issue

Advances in Cell-Based Studies and Therapeutic Approaches for Tissue Regeneration

Message from the Guest Editors

Regenerative medicine is an exciting multidisciplinary field of research that has gradually matured over the last two decades, offering the promise of advanced therapy and the restoration of an impaired or lost function, by regenerating, maintaining, repairing, or, in some severe cases, replacing the disease-compromised tissue or organ. Thus, the novel therapeutic approaches resulting from regenerative medicine and tissue engineering technology may offer new hope for patients with injuries, end-stage organ failure, or other clinical issues. Since the field of regenerative medicine involves the combination of various disciplines, such as medicine, molecular and cellular biology, materials science, and bioengineering, in this Special Issue we encourage the submission of manuscripts that provide new insights on topics related not only to novel stem cell therapies, but also on the use of a wide range of biomaterials and biotechnologies for soft and hard tissue regeneration, with a particular focus on the degenerative and inflammatory diseases. Original research articles and reviews are both welcomed. We look forward to your contributions.

Guest Editors

About the Journal

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. Cells encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Editors-in-Chief

Dr. Alexander E. Kalyuzhny

Dental Basic Sciences, University of Minnesota, 308 Harvard St. SE, Minneapolis, MN 55455, USA

Prof. Dr. Cord Brakebusch

Biotech Research & Innovation Centre, The University of Copenhagen, Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
