

## Special Issue

# Gene and Transcript Therapy for Musculoskeletal Tissue Healing

### Message from the Guest Editor

mRNA is a new class of drug that can be used to express a therapeutic protein and, in contrast to cDNA, is safer and inexpensive. Among its advantages, mRNA immediately begins to express its encoded protein in the cytoplasm. The protein is expressed for a period, after which the RNA is degraded; moreover, there is no risk of genetic impediments, which is one of the concerns with DNA. Nevertheless, the successful application of mRNA for tissue healing in regenerative medicine relies on successfully reducing the immunogenicity of this molecule while increasing its stability upon administration. Much research is being carried out to further develop RNA therapeutics for musculoskeletal tissue healing. The next challenge is to translate gene and transcript (RNA) therapeutics into clinically expedient technologies for musculoskeletal tissue healing. The aim of this Special Issue is to provide an overview of the current advances of gene therapy for tissue healing. We will focus on the tissues of the musculoskeletal system. Novel RNA-based approaches are especially welcome.

### Guest Editor

Prof. Dr. Elizabeth R. Balmayor

Experimental Orthopaedics and Trauma Surgery, Department of Orthopaedic, Trauma, and Reconstructive Surgery, RWTH Aachen University Hospital, D-52074 Aachen, Germany

### Deadline for manuscript submissions

closed (15 September 2023)

## About the Journal

### Message from the Editorial Board

*Cells* has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

---

### Editors-in-Chief

Dr. Alexander E. Kalyuzhny

Dental Basic Sciences, University of Minnesota, 308 Harvard St. SE,  
Minneapolis, MN 55455, USA

Prof. Dr. Cord Brakebusch

Biotech Research & Innovation Centre, The University of Copenhagen,  
Copenhagen, Denmark

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
