Progress in Cancer Immunotherapies

Message from the Guest Editors

In recent years, the field of cancer immunotherapy has undergone a transformative evolution, emerging as a beacon of hope in the fight against cancer. From immune checkpoint inhibitors to adoptive cell therapies, the repertoire of immunotherapeutic strategies continues to expand, presenting unprecedented opportunities to revolutionize cancer care. This Special Issue aims to delineate the contours of this rapidly evolving landscape, concentrating on key aspects such as the development of novel agents, breakthroughs in understanding the intricate interplay of immune cells within the tumor microenvironment, and strides in personalized immunotherapy approaches. As we navigate this exciting frontier, the collective insights presented within this compilation strive to accelerate the translation of groundbreaking discoveries into tangible clinical outcomes, fostering a deeper understanding of the challenges and promises inherent in the pursuit of conquering cancer through the prism of immunological innovation.

Guest Editors

Dr. Van Ngu Trinh

Department of Experimental Radiation Oncology, The University of Texas MD Anderson Cancer Center, Houston, TX, USA

Dr. Phuc Loi Luu

Garvan Institute of Medical Research, Sydney, Australia

About the Journal

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Editors-in-Chief

Dr. Alexander E. Kalyuzhny

Dental Basic Sciences, University of Minnesota, 308 Harvard St. SE,
Minneapolis, MN 55455, USA

Prof. Dr. Cord Brakebusch

Biotech Research & Innovation Centre, The University of Copenhagen,
Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
