Special Issue

Small Molecule Inhibitors: A New Era in Cancer Treatment

Message from the Guest Editors

This Special Issue highlights the transformative role of targeted small-molecule agents in reshaping modern oncology. Small-molecule inhibitors have emerged at the forefront of this shift, offering the ability to selectively disrupt critical molecular pathways that drive tumor growth, survival, angiogenesis, and metastasis.

What sets this class of agents apart is not only their direct antitumor effects but also their evolving role in modulating the immune landscape. Recent advances reveal that small-molecule inhibitors can reprogram the tumor microenvironment, enhance antigen presentation, and overcome immune evasion mechanisms, making them powerful partners in combination with immunotherapies. This Special Issue brings together cutting-edge research and expert reviews on how these agents are expanding therapeutic horizons—from bench to bedside.

By showcasing breakthroughs, challenges, and future directions, this Special Issue will provide readers with a comprehensive understanding of how small-molecule inhibitors are setting a stage for a new era of precision oncology and immune-responsive cancer therapies.

About the Journal

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. Cells encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Editors-in-Chief

Dr. Alexander E. Kalyuzhny

Dental Basic Sciences, University of Minnesota, 308 Harvard St. SE, Minneapolis, MN 55455, USA

Prof. Dr. Cord Brakebusch

Biotech Research & Innovation Centre, The University of Copenhagen, Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
