Biomarkers in Cutaneous Lymphoma

Message from the Guest Editors

Cutaneous lymphoma are a heterogenous group of primary lymphoid malignancies that preferentially traffic to the skin. The clinical manifestations can be exceedingly diverse and benign mimickers challenge accurate diagnosis and impact on a decision in treatment choice. The recent advances in high resolution molecular and genetic characterization of cutaneous lymphomas have led to the identification of novel genes and their proteins that can serve as biomarkers to enhance diagnostic accuracy. These genes include unexpected non-immune genes with unclear roles in oncologic and clinical manifestations. The goal is to identify markers that can increase specificity and potentially serve as actionable targets for novel therapy. The identification of biomarkers will further enhance understanding in the pathogenesis, diagnosis and treatment of cutaneous lymphomas. This special issue on biomarkers in cutaneous lymphoma represent recent progress that have reveal the diverse changes at gene expression level and genetic and epigenetic changes in cutaneous lymphoma.

About the Journal

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Editors-in-Chief

Dr. Alexander E. Kalyuzhny

Dental Basic Sciences, University of Minnesota, 308 Harvard St. SE,
Minneapolis, MN 55455, USA

Prof. Dr. Cord Brakebusch

Biotech Research & Innovation Centre, The University of Copenhagen,
Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
