

Special Issue

Emerging Targets and Therapeutic Strategies in Cancer

Message from the Guest Editors

The emergence of information related to cancer genomes have extended our knowledge towards the altered genes patterns across different cancer types, and enabled a wide array of opportunities to develop new therapeutic strategies. The current research efforts to understand the function and circuitry of cancer associated genes and their patterns provide an alternative approach for elucidating both oncogene and non-oncogene dependencies of cancer. Also, the scientific approach for therapeutic targets engendered by non-oncogene dependencies is much larger than the list of recurrently mutated genes. Owing this in mind, we propose to have a special issue which encompasses a wide range of articles related to emerging targets and therapeutics in cancer. The issue will entertain articles that will help identification of new targets and emerging therapeutics relevant to these fields: **Emerging Targets** Metabolic vulnerabilities Cancer cell plasticity Tumor Microenvironment **Emerging Therapeutics** Nanomedicine Epigenetics and Epitranscriptomics

About the Journal

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Editors-in-Chief

Dr. Alexander E. Kalyuzhny

Dental Basic Sciences, University of Minnesota, 308 Harvard St. SE,
Minneapolis, MN 55455, USA

Prof. Dr. Cord Brakebusch

Biotech Research & Innovation Centre, The University of Copenhagen,
Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
