

Special Issue

Study on Immune Activity of Natural Products

Message from the Guest Editor

We are pleased to invite you to contribute to the Special Issue "Study on Immune Activity of Natural Products".

This Special Issue aims to gather cutting-edge research on the immune-modulating properties of natural products, including plant-derived compounds, marine extracts, and microbial metabolites. By focusing on the mechanisms, efficacy, and applications of these bioactive substances, this collection will contribute to the broader field of cellular and molecular immunology. In this Special Issue, original research articles and comprehensive reviews are welcome. **Research areas may include (but are not limited to) the following:**

- The immunomodulatory effects of natural products derived from plants, animals, and microorganisms;
- Immunostimulatory or the immunosuppressive effects of bioactive compounds;
- How natural products influence immune signaling pathways and immune cells;
- The potential of natural compounds to modulate autoimmune responses and restore immune balance;
- The anti-inflammatory properties of natural products;
- The applications of natural products in autoimmune diseases, infections, and cancer immunotherapy.

We look forward to receiving your contributions.

About the Journal

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Editors-in-Chief

Dr. Alexander E. Kalyuzhny

Dental Basic Sciences, University of Minnesota, 308 Harvard St. SE,
Minneapolis, MN 55455, USA

Prof. Dr. Cord Brakebusch

Biotech Research & Innovation Centre, The University of Copenhagen,
Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
