

## Special Issue

# EGF Receptor (EGFR) Trafficking Pathways: From Epithelial Cell Functions to Epithelial Carcinomas

### Message from the Guest Editor

I hope this message finds you and those you hold dear safe and in good health during these challenging times. I am reaching out to let you know that we are organizing a Special Issue on 'EGF Receptor Trafficking Pathways: From Epithelial Cell Functions to Epithelial Carcinomas' that we think you may be interested in contributing to. Your expertise in the field will be a valuable contribution to this Special Issue. Apart from potential research articles that you might consider to submit, I encourage you and your co-workers to prepare a review on any basic or applied topic which could contribute to the advancement and understanding of physiological EGF receptor biology in polarized epithelial cells, its misappropriation in epithelial carcinomas, and the current state of therapeutic strategies for overcoming resistance to EGF receptor-targeted drugs. We are looking forward to your positive reply to this call! Stay safe and healthy.

### Guest Editor

Prof. Cathleen R. Carlin

Department of Molecular Biology and Microbiology, Case  
Comprehensive Cancer Center, School of Medicine, Case Western  
Reserve University, Cleveland, OH 44106, USA

### Deadline for manuscript submissions

closed (31 December 2022)

## About the Journal

### Message from the Editorial Board

*Cells* has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

---

### Editors-in-Chief

Dr. Alexander E. Kalyuzhny

Dental Basic Sciences, University of Minnesota, 308 Harvard St. SE,  
Minneapolis, MN 55455, USA

Prof. Dr. Cord Brakebusch

Biotech Research & Innovation Centre, The University of Copenhagen,  
Copenhagen, Denmark

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
