Determination of AP-2 Transcription Factors Role in Carcinogenesis

Message from the Guest Editors

In homeostatic conditions, the transcription factors from Activating enhancer-binding Protein 2 (AP-2) family regulate embryogenesis, ensuring the correct formation of limbs, eyes or facial features. Thus, they are mainly expressed during the early stages of development; however, their altered functionality was also found to play a crucial role in carcinogenesis, influencing the prognosis of cancer patients. The fact that each AP-2 transcription factor has a different impact on a given tumor, makes this complex field worth investigating. In this Special Issue, we sincerely encourage you to submit your prominent cancer research related to the AP-2 family to the wider scientific community. It is intended to collect the articles being literature reviews or papers presented in silico, in vitro or in vivo research.

About the Journal

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Editors-in-Chief

Dr. Alexander E. Kalyuzhny

Dental Basic Sciences, University of Minnesota, 308 Harvard St. SE,
Minneapolis, MN 55455, USA

Prof. Dr. Cord Brakebusch

Biotech Research & Innovation Centre, The University of Copenhagen,
Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.5 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
