

## Special Issue

# Fibronectin in Health and Diseases 2022

### Message from the Guest Editor

We are delighted to announce a second edition of the Special Issue on Fibronectin in Health and Diseases, following the success of the first edition, published a year ago ([https://www.mdpi.com/journal/cells/special\\_issues/fibronectin](https://www.mdpi.com/journal/cells/special_issues/fibronectin)). The broad range of topics covered in the previous edition shows the multifaceted role of fibronectin in numerous physiological and pathological processes and highlights the need to closely follow the development of the field. In the second edition, we wish to compile the newest literature on the role of fibronectin in disease progression, the molecular mechanisms through which it coordinates cell function, and its potential as a biomarker, as well as novel insights on its structure, dynamics within the extracellular matrix, response to biochemical and mechanical forces, and interaction partners. We welcome original articles and reviews that add new knowledge to the field, further our understanding of the complex structure–function relationship in fibronectin, and provide novel insights on the role of fibronectin in the pathogenesis and progression of disease. We are looking forward to receiving your work.

## About the Journal

### Message from the Editorial Board

*Cells* has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

---

### Editors-in-Chief

Dr. Alexander E. Kalyuzhny

Dental Basic Sciences, University of Minnesota, 308 Harvard St. SE,  
Minneapolis, MN 55455, USA

Prof. Dr. Cord Brakebusch

Biotech Research & Innovation Centre, The University of Copenhagen,  
Copenhagen, Denmark

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.5 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
