Therapeutic Strategies for Treatment of Inflammatory Bowel Disease

Message from the Guest Editors

In recent years, the inflammatory bowel disease community has witnessed the marketing of novel therapies involving orally administered drugs that target key inflammatory signaling pathways. This is an important development for patients. However, these carefully designed drugs do not cure inflammatory bowel disease; moreover, the active pharmaceutical ingredients have serious side effects, and a sub-group of patients are not responsive to them. Thus, given the personal and societal impact of this disease, this unmet need warrants the continued development of novel therapeutic strategies for the treatment of inflammatory bowel disease.

Guest Editors

About the Journal

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Editors-in-Chief

Dr. Alexander E. Kalyuzhny

Dental Basic Sciences, University of Minnesota, 308 Harvard St. SE,
Minneapolis, MN 55455, USA

Prof. Dr. Cord Brakebusch

Biotech Research & Innovation Centre, The University of Copenhagen,
Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.5 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
