

## Special Issue

# Gene Expression in Adipocytes During Obesity: Understanding Challenges and Future Prospects

### Message from the Guest Editor

Gene expression in adipocytes plays a pivotal role in the development and progression of obesity and its associated metabolic complications. In obesity, adipocytes undergo significant changes in size, number, and functionality, leading to altered gene expression profiles that contribute to chronic low-grade inflammation and insulin resistance. Understanding these molecular alterations is crucial for unraveling the complex pathophysiology of obesity. However, research in this area faces significant challenges, including the heterogeneity of adipose tissue and the interplay between genetic predispositions and (micro-)environmental factors (e.g., hypoxia). Future prospects lie in employing advanced genomic and proteomic technologies, single-cell analysis, and computational modeling to dissect the intricate regulatory networks governing gene expression in adipocytes during obesity, ultimately paving the way for novel therapeutic interventions. The objective of this Special Issue is therefore to shed light on adipocyte pathophysiology on a genetic basis. For this issue, both original research articles and reviews are welcome.

## About the Journal

### Message from the Editorial Board

*Cells* has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

---

### Editors-in-Chief

Dr. Alexander E. Kalyuzhny

Neuroscience, UMN Twin Cities, 6-145 Jackson Hall, 321 Church St SE,  
Minneapolis, MN 55455, USA

Prof. Dr. Cord Brakebusch

Biotech Research & Innovation Centre, The University of Copenhagen,  
Copenhagen, Denmark

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.5 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
