Cellular Mechanisms in Autoimmune Encephalitis: Biology and Potential Therapeutic Implications

Message from the Guest Editors

Neuroimmune disorders encompass a diverse spectrum of conditions characterized by inflammation of the central nervous system. In recent years, investigations into cell- and antibody-mediated neurological disorders have unveiled a multitude of factors that may trigger the onset of these conditions, such as paraneoplastic associations, infection-induced responses, or genetic predisposition. The aim of this Special Issue is to comprehensively explore all facets of autoimmune neurological disorders, with a particular focus on the underlying pathophysiological mechanisms and genetics, current therapeutic strategies, and emerging challenges in this field. We cordially invite experts with an interest in this Special Issue to submit original research manuscripts and comprehensive reviews addressing any of the aforementioned themes.

Guest Editors

Dr. Mar Petit-Pedrol

Werfen Autoimmunity, OEM Technological Center, Barcelona, Spain

Dr. Dominique Fernandes

Interdisciplinary Institute for Neuroscience, IINS-CNRS, Bordeaux, France

Deadline for manuscript submissions

About the Journal

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Editors-in-Chief

Dr. Alexander E. Kalyuzhny

Dental Basic Sciences, University of Minnesota, 308 Harvard St. SE,
Minneapolis, MN 55455, USA

Prof. Dr. Cord Brakebusch

Biotech Research & Innovation Centre, The University of Copenhagen,
Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.5 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
