

## Special Issue

# Hormone Receptors in Cancers: From Molecular Insights to Clinical Applications

### Message from the Guest Editors

This Special Issue aims to highlight the latest advances in our understanding of how hormone receptors influence cancer biology. We welcome original research articles and reviews that explore the mechanistic roles of hormone receptors, their interactions with co-regulators, post-translational modifications, and their potential as prognostic markers or therapeutic targets. Studies encompassing in vitro experiments, in vivo investigations using animal models, as they collectively contribute to a comprehensive understanding of receptor-mediated pathways. Submissions addressing emerging receptor types, non-genomic actions, receptor isoforms, and resistance mechanisms to endocrine therapy are particularly encouraged. We hope this Special Issue will provide valuable insights into hormone receptor-driven oncogenesis and support the development of innovative strategies for diagnosis, prognosis, and treatment.

### Guest Editors

Dr. Edris Choupani

Department of Molecular Biology and Biochemistry, Rutgers University, Piscataway, NJ 08854, USA

Dr. Kambiz Hassanzadeh

Robert Wood Johnson Medical School, Institute for Neurological Therapeutics, Department of Neurology, Rutgers Biomedical and Health Sciences, Piscataway, NJ, USA

### Deadline for manuscript submissions

15 December 2025

## About the Journal

### Message from the Editorial Board

*Cells* has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

---

### Editors-in-Chief

Dr. Alexander E. Kalyuzhny

Dental Basic Sciences, University of Minnesota, 308 Harvard St. SE,  
Minneapolis, MN 55455, USA

Prof. Dr. Cord Brakebusch

Biotech Research & Innovation Centre, The University of Copenhagen,  
Copenhagen, Denmark

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
