Molecular Mechanism of Autoimmune Hepatitis and Biliary Cholangiopathy

Message from the Guest Editor

In recent years, hepatology has undergone a significant development thanks to the introduction of direct-acting antiviral therapy (DAA). This will lead to the complete eradication of hepatitis C virus (HCV). Now, particular attention is being paid to autoimmune hepatitis and autoimmune cholangiopathies which, together with non-alcoholic steato-hepatitis (NASH), will represent the major cause of cirrhosis and its complications in the near future. This Special Issue will focus on the molecular mechanisms that underlie these autoimmune diseases—their development, progression, and complications—to hopefully identify specific molecular targets for their treatment.

About the Journal

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Editors-in-Chief

Dr. Alexander E. Kalyuzhny

Dental Basic Sciences, University of Minnesota, 308 Harvard St. SE,
Minneapolis, MN 55455, USA

Prof. Dr. Cord Brakebusch

Biotech Research & Innovation Centre, The University of Copenhagen,
Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
