

Special Issue

Platelets as Pathophysiological Drivers of Thrombo-Inflammation and Immune Response

Message from the Guest Editors

Considering the perplexity of platelet-immune cell interaction, investigations revealing molecular insights and implementing novel therapeutic strategies tailoring this thrombosis-inflammation interface, are undeniably the need of the hour. Ongoing preclinical and clinical studies are pursuing efficacious drug targets and testing novel therapeutics against atherosclerosis, cardio/cerebrovascular disease, deep vein thrombosis, pulmonary embolism, ITP, HIT-associated thrombosis. This 'Special Issue' aims to provide an overview and a translational perspective on the multifaceted aspects of thrombo-inflammation. This will not only reveal prospects to exploit therapeutically but also identify obstacles to be surmounted for thromboprophylaxis. Scope for the special issue: Reviews, research articles, communications and technical notes on basic, preclinical, clinical studies exploring the pathophysiological role of platelets in immune homeostasis or during bacterial or viral infections; the thrombo-inflammatory attributes of platelets in Cardio/Cerebrovascular disease and in platelet associated inherited or acquired immune disorders.

About the Journal

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Editors-in-Chief

Dr. Alexander E. Kalyuzhny

Dental Basic Sciences, University of Minnesota, 308 Harvard St. SE,
Minneapolis, MN 55455, USA

Prof. Dr. Cord Brakebusch

Biotech Research & Innovation Centre, The University of Copenhagen,
Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
