

## Special Issue

# Cardiovascular Biomarkers: Current Status and Future Directions

### Message from the Guest Editors

After the initial increase in activity in genetic research in cardiovascular and perioperative medicine subsided due to the complexity and large cohorts that were required, the international research community put emphasis on biomarkers. These proteins are easy to analyze, often even in the routine laboratory, and have provided increasingly valuable data in recent years, especially in the acute care and perioperative setting. In cardiovascular medicine, in particular, we have gained a better understanding of how biomarkers can be effectively used for personalized risk analysis and outcome prediction purposes. In this Special Issue, we focus on the current status and future directions in cardiovascular biomarker research and invite the international community to submit carefully developed results from this research area.

## About the Journal

### Message from the Editorial Board

*Cells* has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

---

### Editors-in-Chief

Dr. Alexander E. Kalyuzhny

Dental Basic Sciences, University of Minnesota, 308 Harvard St. SE,  
Minneapolis, MN 55455, USA

Prof. Dr. Cord Brakebusch

Biotech Research & Innovation Centre, The University of Copenhagen,  
Copenhagen, Denmark

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.5 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
