

## Special Issue

# An Advanced Approach in Male Infertility: Stem Cell Therapy

### Message from the Guest Editors

Infertility is now considered to be a global health issue affecting approximately 15% of couples worldwide. In the past decade, research in male reproduction has seen substantial advancements in next-generation therapeutics using stem cells. Different *in vitro* methods and organ models using embryonic stem cells, induced pluripotent stem cells, and glioblastoma stem cells were developed for successful production of spermatozoa. Also, autografting cryobanked spermatogonial tissue was proposed as a new strategy of fertility preservation for paediatric patients who have undergone gonadotoxic therapy. This Special Issue aims to provide an update of the potential therapeutic approaches and their impact on ART outcomes. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but not limited to) the following: Embryonic Stem Cells (ESC), Induced Pluripotent Stem Cells (iPSC), Mesenchymal Stem Cells (MSCs), Bone Marrow Mesenchymal Stem Cells (BMSC), Spermatogonial Stem Cell (SSC) and spermatogonial tissue cryopreservation. We look forward to receiving your contributions.

### Guest Editors

Dr. Andrea Garolla

Unit of Andrology and Reproductive Medicine, Department of Medicine, University of Padova, Padova, Italy

Dr. Andrea Di Nisio

Department of Medicine DIMED, University of Padova | UNIPD, Padova, Veneto, Italy

### Deadline for manuscript submissions

closed (20 March 2023)

## About the Journal

### Message from the Editorial Board

*Cells* has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

---

### Editors-in-Chief

Dr. Alexander E. Kalyuzhny

Dental Basic Sciences, University of Minnesota, 308 Harvard St. SE,  
Minneapolis, MN 55455, USA

Prof. Dr. Cord Brakebusch

Biotech Research & Innovation Centre, The University of Copenhagen,  
Copenhagen, Denmark

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
