

## Special Issue

# The Regulation of the Cell Cycle II

### Message from the Guest Editors

This second Special Issue of the journal *Cells*, “The Regulation of the Cell Cycle II” aims to familiarize readers with the new aspects of the cell cycle beyond the basic principles. It will collect from leading cell cycle specialists answers to the most pressing issues related to current investigations in multicellular organisms and the cell cycle’s link to human pathologies in particular cancers. Questions we seek to answer include, but are not limited to, the following:

- Beyond kinases, what is the role of phosphatases?
- How many checkpoints are there?
- What are the functions of the centrosome and cilia?
- What is the connection between the cell cycle and cancer?
- What are the functions of cytokinesis, abscission, and midbody?
- Is there cell division in epithelia?
- What is the connection between the cell cycle and evolution?
- How can we explain asymmetric cell division?
- What is the connection between cell division and organ size?

---

### Guest Editors

Dr. Rustem E. Uzbekov

Laboratory of Cell Biology and Electron Microscopy, Faculty of Medicine, University of Tours, 10, Boulevard Tonnelle, 37032 Tours, France

Dr. Claude Prigent

Directeur Centre de Recherche en Biologie cellulaire de Montpellier (CRBM), Cell Cycle Team, CNRS CRBM UMR5237, CEDEX 05, 34293 Montpellier, France

---

### Deadline for manuscript submissions

closed (29 February 2024)

## About the Journal

### Message from the Editorial Board

*Cells* has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

---

### Editors-in-Chief

Dr. Alexander E. Kalyuzhny

Dental Basic Sciences, University of Minnesota, 308 Harvard St. SE,  
Minneapolis, MN 55455, USA

Prof. Dr. Cord Brakebusch

Biotech Research & Innovation Centre, The University of Copenhagen,  
Copenhagen, Denmark

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.5 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
