Translational Oncobiology: From Molecular Mechanisms to Targeted Therapies

Message from the Guest Editor

We are delighted to invite you to contribute to a Special Issue in the journal *Cells*, entitled “Translational Oncology: From Molecular Mechanisms to Targeted Therapies.” In this Special Issue, we plan to demonstrate how science is close to patients in some of the most representative fields of oncology. Indeed, since the definition of the hallmarks of cancer by Douglas Hanahan and Robert Weinberg (Cell. 2011 Mar 4;144(5):646-74), a setting of discoveries confirmed how relevant they can be in the development of cancer treatments from bench to bedside. In this Special Issue, we intend to assemble contributions on translational medicine applied to cancer patients. Additionally, we will address the future contribution of computational biology and nanomedicine to oncology. We are looking forward to your contributions to this Special Issue.

About the Journal

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Editors-in-Chief

Dr. Alexander E. Kalyuzhny

Dental Basic Sciences, University of Minnesota, 308 Harvard St. SE,
Minneapolis, MN 55455, USA

Prof. Dr. Cord Brakebusch

Biotech Research & Innovation Centre, The University of Copenhagen,
Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
