

# Special Issue

## Advances in Aquaporins

### Message from the Guest Editor

Aquaporins are a family of transmembrane channel proteins widespread throughout nature where they facilitate the transport of water and small solutes into and out of cells. They are widely studied in prokaryotic and eukaryotic biology playing different roles. Aquaporins are also implicated in several clinical disorders and their interest in the field of medicine is strong. This Special Issue welcomes original research and review papers addressing every aspect of aquaporins, including function and regulation in biology and medicine as well as their translational value in pharmacology, biotechnologies (water purification) and agriculture. Hopefully, interdisciplinary applications of the knowledge will stimulate future research.

## About the Journal

### Message from the Editorial Board

*Cells* has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

---

### Editors-in-Chief

Dr. Alexander E. Kalyuzhny

Dental Basic Sciences, University of Minnesota, 308 Harvard St. SE,  
Minneapolis, MN 55455, USA

Prof. Dr. Cord Brakebusch

Biotech Research & Innovation Centre, The University of Copenhagen,  
Copenhagen, Denmark

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
