

Special Issue

Exclusive Review Papers in "Cellular Immunology"

Message from the Guest Editor

Major breakthroughs continue to be seen in the realm of cellular immunology relevant to fields including, but not exclusive to autoimmunity, oncology, infectious diseases, transplantation, and allergy. In addition to strengthening the understanding of the molecular mechanisms related to these conditions, major discoveries such as the pivotal roles of CTLA4 and PD-1 in braking T cell activation, as well as the development of novel cell-based therapies such as CAR-T cells, have led to novel therapeutic strategies that tremendously improve the survival of patients with malignancies, and potentially of patients with other immune-related conditions, such as clinical autoimmunity. In this Special Issue, recent advances in the discoveries of molecular mechanisms of cell immunology related to medical conditions, including various immunological, infectious, and malignant diseases, as well as their major ramifications pertaining to therapies and prognostications of these conditions, will be critically explored and discussed. **Keywords**

- immunology
- autoimmunity
- oncology
- transplantation
- lymphocytes
- dendritic cells
- monocytes
- plasma cells

About the Journal

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Editors-in-Chief

Dr. Alexander E. Kalyuzhny

Dental Basic Sciences, University of Minnesota, 308 Harvard St. SE,
Minneapolis, MN 55455, USA

Prof. Dr. Cord Brakebusch

Biotech Research & Innovation Centre, The University of Copenhagen,
Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
