

Special Issue

Cells of the Cerebellum

Message from the Guest Editors

The cerebellum is a highly organized brain structure that is well known for its roles in motor coordination and learning. More recently, the cerebellum has also been implicated in cognitive function. Detailed understanding of the anatomical and physiological properties of cerebellar neurons, dating back over centuries, has greatly contributed to our understanding of how the cerebellum processes information and contributes to behavior. However, recent applications of single-cell physiology, optogenetics and transcriptomics make clear that there is still much to be learned about the cellular composition of the cerebellum and the circuits that cerebellar neurons form. This Special Issue focuses on novel insights into the cellular and circuit organization of the cerebellum, to advance our understanding of cerebellar function in health and disease. **Keywords:** cerebellar neurons; cerebellar synapses; cerebellar circuit organization; cerebellar function; cerebellar disorders; cerebellar learning and behavior

Guest Editors

Prof. Dr. George Augustine

Temasek Life Sciences Laboratory, 1 Research Link, Singapore 117604, Singapore

Dr. Jinsook Kim

About the Journal

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Editors-in-Chief

Dr. Alexander E. Kalyuzhny

Dental Basic Sciences, University of Minnesota, 308 Harvard St. SE,
Minneapolis, MN 55455, USA

Prof. Dr. Cord Brakebusch

Biotech Research & Innovation Centre, The University of Copenhagen,
Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
