

Special Issue

The Role of Telomere Biology in Aging and Human Disease II

Message from the Guest Editors

In this Special Issue of *Cells*, we invite your contributions, either in the form of original research articles, reviews, or shorter perspective articles on all aspects related to the theme of “The Role of Telomere Biology in Aging and Human Disease”. Articles with mechanistic and functional insights from a cell and molecular biological perspective are especially welcome. Relevant topics include but are not limited to:

- Telomere biology and cancer;
- Telomere biology and the environment;
- Telomere dynamics in stem and progenitor cells;
- Heritable telomere disorders;
- Modes of telomere dysfunction in human systems;
- Human telomere biology;
- Telomeres and aging;
- The role of telomeres in cardiovascular disease;
- Telomere biology and disease resistance (including tumor suppression) pathways;
- Telomere biology and the DNA damage response.

Guest Editors

Prof. Dr. Rajiv Kumar

Division of Functional Genome Analysis, German Cancer Research Center, Im Neunheimer Feld 580, 69120 Heidelberg, Germany

Dr. David Gilley

Department of Chemistry and Applied Biological Sciences, South Dakota School of Mines & Technology, Rapid City, SD 57701, USA

Deadline for manuscript submissions

About the Journal

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Editors-in-Chief

Dr. Alexander E. Kalyuzhny

Dental Basic Sciences, University of Minnesota, 308 Harvard St. SE,
Minneapolis, MN 55455, USA

Prof. Dr. Cord Brakebusch

Biotech Research & Innovation Centre, The University of Copenhagen,
Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
