

## Special Issue

# Identification of Prognostic Markers in Cancer Biology

### Message from the Guest Editors

The precise definition of the biology of a given tumor represents the first step to delineating cancer patient prognosis. Scientists, medical oncologists, surgeons, and pathologists are all actively involved in studies aimed at better stratifying cancer patients with respect to their outcome, and translational efforts dedicated to the development and validation of new biomarkers in tissue specimens and bodily fluids are key for the success of precision medicine in oncology. In this Special Issue, we aim to collect a series of original studies and review articles focused on recent advances in cancer biology, and in particular on how specific techniques and/or the study of specific biomarkers may be instrumental to better stratify prognosis of patients and help to design the best therapeutic option of cancer patients. We are looking forward to your contributions to this Special Issue.

### Guest Editors

Prof. Anna Sapino

University of Turin, Turin, Italy  
Candiolo Cancer Institute-FPO- IRCCS, Candiolo, Italy

Dr. Caterina Marchiò

1. Department of Medical Sciences, University of Turin, Turin, Italy  
2. Candiolo Cancer Institute-FPO- IRCCS, Candiolo, Italy

### Deadline for manuscript submissions

closed (31 March 2021)

## About the Journal

### Message from the Editorial Board

*Cells* has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

---

### Editors-in-Chief

Dr. Alexander E. Kalyuzhny

Dental Basic Sciences, University of Minnesota, 308 Harvard St. SE,  
Minneapolis, MN 55455, USA

Prof. Dr. Cord Brakebusch

Biotech Research & Innovation Centre, The University of Copenhagen,  
Copenhagen, Denmark

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
