Oxysterols and the Immune Response: Implications in Non-communicable and Infectious Diseases

Message from the Guest Editors

This Special Issue will take into account reports dealing with these different aspects as well as pharmacological studies on molecules that modulate the biological activities of oxysterols in both infectious and non-communicable inflammatory diseases. Keywords

- Oxysterols
- Immune response
- Inflammation
- Autoimmunity
- Cytokine storm
- Chronic inflammatory diseases
- Infectious diseases
- Viruses
- Bacteria
- Parasites

About the Journal

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
