

## Topical Collection

# Cellular and Molecular Pathophysiology of Vascular Proliferative Diseases

### Message from the Collection Editor

Current advances in the study of pathogenesis have revealed that vascular proliferative diseases involve a combination of multiple causative factors (genomic, epigenomic and environmental factors), which consequentially triggers signaling cascades of downstream effects, resulting in the complex and heterogeneous phenotypes. Therefore, investigating the mechanism pathways underlying vascular dysfunction and remodeling can help design the potential key targets and find the most effective treatment. The main aim of this Topical Collection is to publish cutting-edge research using cutting-edge tools and technologies that can significantly advance the understanding of vascular diseases and transform future therapies.

## About the Journal

### Message from the Editorial Board

*Cells* has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

---

### Editors-in-Chief

Dr. Alexander E. Kalyuzhny

Dental Basic Sciences, University of Minnesota, 308 Harvard St. SE,  
Minneapolis, MN 55455, USA

Prof. Dr. Cord Brakebusch

Biotech Research & Innovation Centre, The University of Copenhagen,  
Copenhagen, Denmark

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
